

Tolu Peters

Operations Leadership

Overview

Tolu is an executive level manufacturing operations expert with 20 years experience in industry, such as, medical device, aerospace, and cryogenics. Tolu is a turnaround expert with experience turning around cash flow and manufacturing capacity limited companies. Leveraging a passion for delivering operational excellence, he effectively developed executive and technical expertise in building corporate value and improving profitability by focusing on educating and empowering corporate talent. He was a member of a medical device startup that eventually sold the technology. Tolu held and had accountability for executive level corporate positions, such as, Vice President of Operations, Director of Manufacturing, General Manager, and Plant Manager. Additional, Mr. Peters has cross-border experience working in operations at a facility in Mexico. Mr. Peters is a Certified Lean Six Sigma from the UCSD.

Key Accomplishments
